Dear Scott:

The attached Paper by Post et al (2009) gives the values for PFOA Table 3 page 4549. I do not of hand know if there are comparable data on PFOS in those systems. I do not believe that any PFOS there was from the local industries. 3M was the major PFOS manufacturer.

Would either 1 or 2 PM work for you tomorrow afternoon. Let me know and I will put the time on my calendar.

My phone number is 202-566-1098. I will send you the material I have put together later today. I have made it specific to PFOS.

Joyce Donohue

Thanks.

While I'm thinking of it, do you happen to know about what concentration of PFOS/PFOA was in the drinking water in the Parkersburg, WV area for which all the epidemiological studies were done?

Scott

Not at all, Joyce is on my staff and an expert on PFAS.

Thanks,
Jamie

Scott,
I would refer you to Joyce Donohue, she can be reached at 202-566-1098. She is the chemical manager for PFOA and PFOS health advisories. She would be happy to talk to you.

Thanks,
Jamie

Jamie:

I'm on a committee here at TDEC reviewing the EPA PFOS/PFOA advisory. My background is in aquatic toxicology, but wanted to get some input on the process EPA used to develop the PFOS advisory level of 70 ppt.

Can you walk me through the general steps in the risk assessment with respect to data used, uptake and safety factors, assumptions, etc. that went into that calculation. Just a 30,000 ft. summary is fine.

Thank you.

Scott
